**Narrative** Give one example of how Faith Community Nursing made a difference (Continue on other side)

---

Unfortunately, it took three visits of to get to the crux of the matter. But once the underlying concern was found, arrangements were made for an elderly couple to receive meals once a week. The wife could no longer cook; the husband was doing with the cooking with his wife overseeing the seasoning. This was frustrating to both; thus, having a meal brought in once a week was making a difference in the quality of their lives. It is amazing how such a little thing can make a big difference.
